March 2025

Dear Sir/Madam

RE King George VI Reservoir Stanwell Moor SCC Ref 2019/0215

We wrote to you in February 2022 regarding this application and I have attached it for ease of reference. Looking at the documents on your website it is not clear that any of the matters raised by us have been taken into consideration by the applicants. This is disappointing. Our objection still stands.

I cannot see on your website responses from Natural England or the Environment Agency or whether their responses have been taken account of by the applicants. Has the County ecologist been involved?

This is an extremely sensitive site particularly for bird life and it is inevitable that floating dredgers and conveyer belts will have an adverse impact on the wildlife and therefore on the official designations including SSSI.

The new element is a Bailey bridge over the River Colne which could be there for a considerable time looks crude and the design does not appear to address any ecological concerns regarding damage to the river bank and impacts on the flow of the river during flooding.

I would be grateful if you could reply to us with regard to the first two points.

We would however recommend that this application be refused.

Yours sincerely

Jane Griffin MRTPI
